## Projects

2024/04 – present	<b>Customer Relationship Management (CRM) Application Development</b> <i>Building a Comprehensive CRM Solution Using PowerApps, Power Automate, and MySQL</i> <p>This project involved developing a robust and user-friendly CRM application tailored to streamline customer interactions and data management. Leveraging Microsoft PowerApps for a dynamic user interface, Power Automate for process automation, and MySQL for secure data storage, the application centralizes customer data, automates workflows, and enhances collaboration across departments. The CRM application facilitates efficient management of customer interactions, lead tracking, and reporting, providing actionable insights to improve customer satisfaction and business performance.</p>
